https://leoreoreo.github.io/

EDUCATION

University of Notre Dame | Notre Dame, IN   May, 2026
Bachelor of Science   *GPA: 3.9*
Major: Computer Science
Supplementary major: Applied and Computational Mathematics and Statistics
Current Courseworks: Theory of Computing, Systems Programming, Linear Algebra & Differential Equation, Probability

University of Notre Dame | London, UK   May, 2023 – June, 2023
London, England Summer Engineering Study Abroad
Courses: Machine Learning for Engineers, Creative Programming with Processing

RELATED COURSEWORK OR PROJECTS

Machine Learning for Engineers | University of Notre Dame (UK)   June, 2023
- Learned machine learning theories and Python sklearn and tensorflow libraries implementations
- Predicted wine quality using logistic regression with SGD optimizer and different regularization methods

Engineering Computing | University of Notre Dame   May, 2023
- Provided information for users to make informed decisions about travel plans
- Cleaned and visualized CSV datas with Python pandas and matplotlib libraries
- Created a corresponding website (https://leoreoreo.github.io/EGcomp-Final-Project-Web/) with HTML and CSS

EXPERIENCE

Privacy Sandbox | Notre Dame, IN   September, 2023 – Now
Research Assistant: Privacy Sandbox web development
- Participate in creating a website that generates virtual internet user personas used to analyze users' privacy loss
- Use Python&Flask for backend, Javascript&React for frontend, and SQLite for database

Notre Dame Video Game Development Club | Notre Dame, IN   February, 2023 – Now
Project: Dungeons and Domers game development
- Participate in developing a 2D dungeon crawler game with Unity
- Lead parts of room design, room tiles construction, and player camera programming

Everbright Securities Asset Management CO., LTD | Shanghai, China   July, 2023 – August, 2023
Data Analyst Intern: Application of Machine Learning in Investment Forecasting
- Analyzed research papers and identify potential machine learning strategies to improve investment forecasting
- Attempted to integrate additive, self, and multi-head sparse self attention modules to GRU model with PyTorch

Institute of Microelectronics of Chinese Academy of Sciences | Beijing, China   July, 2021 – August, 2021
Research: Road Traffic Sign Recognition Based on Lightweight Neural Network
- Compared the application of YOLO-MoblieNet-V1, V2, V3, and YOLO-V4-tiny in traffic sign recognition
- Poster presented at The 10th Applied Optics and Photonics China (AOPC2021)
- Paper accepted by Society of Photo-Optical Instrumentation Engineers (SPIE)

LEADERSHIP AND ACTIVITIES

Shanghai Adolescents Science and Technology Innovation Contest | Shanghai, China   June, 2021 – October, 2021
Project: Automatic Triangular Traffic Warning Sign
- Designed and constructed an automatically set up triangular warning sign with PID in C and Micro Python
- Won 2nd prize at Shanghai Adolescents Science and Technology Innovation Contest
- Won China Thinks Big 2020-2021 National Trails 3rd prize and CTB Inventor
- Granted a patent and receive high recognition from SAIC

TECHNICAL AND LANGUAGE SKILLS

Technical: C, Python (Flask, PyTorch, sklearn, Tensorflow), Java, Javascript (React), HTML/CSS, SQLite, Matlab, Unity C#
Language: Chinese, English
